

Kaffir Corn and Milo Maize Grinder

Why waste your feed? When with a small investment you can save from 25 to 50 per cent by grinding it. This is especially true as to Milo and Kaffir corn. The Stover Mill shown above will grind Kaffir or Milo in the head, and has a capacity of 300 to 3,000 lbs. per hour, according to power used and fineness of grinding. It will also grind shelled or threshed grain. Remember this is not a Kaffir Grinder in name only, but it is a GRINDER in fact; and we are willing to let any prospective purchaser try it, and we will Guarantee to Grind more Kaffir or Maize in the head than any Mill made with the same amount of power. ANIMADO CLUB
IN OWN HOME

Young Mexicans Have 145 Pound Football Team That Awaits All Comers; Second Team Challenges at 125 Grid-side

El Club Animado (the live ones) met for the first time last evening in their new club quarters in Union Hall, North Third street. Practically the entire membership of fifty-five was present.

The Animados have recently defeated the town Indian football team in a tough 7-0 game, and are now looking for material for another gridiron clash, at 145 pounds. A second eleven of the club is also being trained, and will be glad to hear from teams weighing an average of about 125 pounds.

The Animado club is one of the liveliest organizations of its sort in the city. It is composed entirely of young Mexican boys, who have a community interest in sports. They are lacking a few other lines of sport beside football, however. A wrestler, a weight man and others are among them, ready to give or accept challenges.

WIRE TO NEW ORLEANS
IS OPEN AND WORKING

In answer to numerous inquiries in regard to the state of the wires to New Orleans, the Western Union Telegraph company yesterday gave out the following statement through its district agent Mann:

The Western Union Telegraph company announces that notwithstanding the work of restoring its lines to New Orleans has been impeded by heavy rains in that section substantial progress has been made and that at the opening of business this morning a number of wires were available for service although their efficiency was below normal because of swings caused by the prevailing high winds and continued rains. It is understood that the Western Union lines constitute the sole means of telegraphic communication with New Orleans up to date and officials of the company point with considerable pride to this achievement, the notable character of which will be apparent when it is understood that the damage was so severe that train service by some of the routes will hardly be restored for several weeks.

CHAPMAN PROMOTED—J. B. Chapman, for three years head of the Armour Packing company's local agency, has been promoted to El Paso to take charge of the company's interests there. As the El Paso plant is one of the largest and most important in the west, this is a material promotion for Chapman, and his friends here are offering him many congratulations.

SAGE TEA PUTS LIFE
AND COLOR IN HAIR

Don't Stay Gray! Sage Tea and Sulphur Darkens Hair so Naturally that Nobody can tell.

You can turn gray, faded hair beautifully dark and lustrous almost ever night if you'll get a 50 cent bottle of "Wyeth's Sage and Sulphur Compound" at any drug store. Millions of bottles of this old, famous Sage Tea Recipe are sold annually, says a well-known druggist here, because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray, becoming faded, dry, scraggly and thin have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful—all dandruff goes, scalp itching and falling hair stops. This is the age of youth. Gray-haired, unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur tonight, and you'll be delighted with your dark, handsome within a few days.

NARROW ESCAPE
FOR STUDENTS

Party of Campers Returning from Two Days' Trip Are Just Missed by Fast Going Railroad Auto Carrying Officials

An outing of two days and two nights that had provided almost unlimited fun and pleasure for the participants was badly marred when a lead-on collision between the trolley and a railway auto was narrowly averted at the crossing two miles south of Tempe. The party of campers was composed of normal training school teachers and several of the professors of the normal. It is presumed that railway officials were in the machine. It was shortly after dark when the trolley hoisted the crossing, the horn of the machine was heard but seeing no lights the driver proceeded and the trolley was directly across the track when the railway machine was first seen less than half a hundred yards off. A passenger in the rear seat of the trolley said after the occurrence: "I could have put out my hand and touched the machine as it flashed by." The outing in the heart of the Hilarious canyon was immensely enjoyed by the campers and but for the untimely event on the way home the trip would have been one almost without comparison.
